Dr. Susan Billmaier (billmaier@woodrow.org) serves as program officer for two dissertation fellowships at the Woodrow Wilson Foundation: the Charlotte W. Newcombe Doctoral Dissertation Fellowship and the Woodrow Wilson Dissertation Fellowship in Women’s Studies. A member of the Woodrow Wilson staff since 2008, she earned her Ph.D. in political science from Rutgers University and has taught in the areas of American politics, women and politics, and traditions of western political theory. Dr. Billmaier also facilitates workshops on learning styles, personality assessment, and conflict resolution.

Dr. Rebecca Casciano (rebecca@glassfrog.us) studied sociology and demography at Princeton and graduated with her Ph.D. in Sociology in 2009. After graduate school, she completed a postdoc (also at Princeton) and started consulting for nonprofit organizations on the side in order to gain extra experience using her skills in an applied setting. Upon the completion of her postdoc, Rebecca started Glass Frog Solutions, a consulting firm that provides research and evaluation support to nonprofit organizations primarily in the education and youth development sector. The firm provides a variety of supports to nonprofits, ranging from program theory and design services to multi-year, federally funded impact evaluations. Today, she spends about half her time working directly on a range of short- and long-term projects and the other half of her time managing the business and the small team of researchers who now work for Glass Frog.

Dr. Kelly Freidenfelds (kellyf@Princeton.edu) is the associate director, corporate and foundation relations. Within Princeton’s Corporate Engagement and Foundation Relations office, Kelly works to build stronger relations with private foundations in support of faculty research and University priorities, with a focus on the humanities, social sciences and diversity initiatives. She most recently served as manager of corporate, foundation and government relations at the Princeton University Art Museum. Prior to coming to Princeton, she supported development efforts at Kingsborough Community College, New York University Stern School of Business, and the Bard Graduate Center. Kelly holds a Ph.D. in cultural anthropology from Stanford University and a B.A. from Wesleyan University.

Dr. Briann G. Greenfield (bgreenfield@njch.org) is a U.S. social and cultural historian, an accomplished author, teacher, and administrator, and a public history/humanities specialist with experience in nonprofit leadership, strategic planning, human resources, collections planning, and grant making. She is dedicated to building strong history and humanities organizations that serve the public good. Briann is currently Executive Director of the New Jersey Council for the Humanities, a state partner of the National Endowment for the Humanities with a mission to harness the power of the humanities to strengthen our pluralistic society. Previously, Briann was Professor of History at Central Connecticut State University where she administered the department’s Public History Program and taught broadly across the curriculum. Briann received her M.A. in Museum Studies and her Ph.D. in American Studies from Brown University. Briann has served as a trustee of Connecticut Humanities and as a member of the Connecticut Historical Society’s Collections Steering Committee. She is the author of Out of the Attic: Inventing Antiques in Twentieth-Century New England (Amherst: University of Massachusetts Press, 2009).
Dr. Jason Klugman (jklugman@Princeton.EDU) joined the Princeton University Program in Teacher Preparation in 2004 and teaches the Seminar in Education (TPP 401) that is taken concurrently with student teaching. He advises students and teaches courses in Teacher Prep, as well as teaching a course on ethnography of education in Princeton’s Anthropology department. Dr. Klugman also serves as Director of the Princeton University Preparatory Program (PUPP), a comprehensive college preparation initiative serving low-income, high achieving high school students from the Trenton/Princeton region. He earned his doctorate in Education, Culture and Society at the University of Pennsylvania’s Graduate School of Education where he studied the process of becoming an urban teacher and taught courses in urban studies and the foundations of education. His dissertation, “Weapon Scans, Lesson Plans and Power-less Computer: Becoming a teacher in urban America” examined the journey of a group of student teachers in Philadelphia (including himself) during the 1998-99 academic year. Prior to coming to Princeton in 2004, Jason was a social studies teacher and department chair at West Philadelphia High School and a leader of that school’s college and career guidance team. He also taught courses in Urban Studies and Education at the University of Pennsylvania. He holds a bachelor’s degree in Political Science from Johns Hopkins University and teacher certifications in secondary social studies and English.

Dr. Janice Stultz Roddenbery *77 (jroddenbery@verizon.net) earned a doctorate in Romance Languages from Princeton in 1977. Her professional life included teaching, journalism, publishing and fundraising. She was a consultant to non-profits for 28 years, specializing in capital campaigns for small and mid-sized organizations. Her clients included organizations in social services, education, health care, the arts, and the environment. Before becoming a full-time consultant, Janice worked in the development offices of Temple University, Princeton University, the Parsons School of Design and Barnard College. She has served on several non-profit boards and was president of two of them, including the Association of Princeton Graduate Alumni (APGA).

Dr. Ashley Zauderer leads the Mathematical & Physical Sciences Department for the John Templeton Foundation. Ashley develops a portfolio of research grants focused on foundational questions on the nature of reality within the realm of mathematics, physics, cosmology, astronomy, chemistry, or other physical sciences. She currently manages an active portfolio of 80 grants totaling more than $60 million. Ashley’s academic research focus is observational radio astronomy applied to some of the most explosive astrophysical transients in the Universe including supernovae, gamma-ray bursts, and tidal disruption flares. She has also studied colliding wind binary star systems, the interstellar medium, merging galaxies, and an atmospheric correction technique for radio telescopes analogous to laser guide star adaptive optics. Before joining the foundation, Ashley was an NSF Astronomy & Astrophysics Postdoctoral Fellow and prior to that, a Research Fellow in the Berger Time Domain Group at Harvard University. She completed her Masters and Ph.D. in Astronomy at the University of Maryland College Park and her bachelor’s in Astrophysics at Agnes Scott College where she played collegiate basketball. Ashley has an interest in education and science-faith topics, working as a Christine Mirzayan Science & Technology Policy Fellow in the Executive Office at the National Academy of Sciences on the Science, Evolution, and Creationism publication. She has spent time at Yonsei University in Seoul as an NSF East Asia and Pacific Summer Institute Fellow, at the Arecibo Observatory in Puerto Rico as a research intern for Cornell, and at the Owens Valley Radio Observatory in Big Pine, CA for the California Institute of Technology.
