Pathways with a Ph.D. Plus Summer Boot Camp

July 23, 24, 25 *only a few spots left*
10 am - 3 pm
Louis A. Simpson Building B60 ABC
Lunch will be provided!
Explore the possibilities and resources for using your transferable skills - research, writing, teaching, project management- all hallmarks of a rigorous Ph.D. program. Explore the diverse range of careers fields and organizations open to you through conversations with graduate alumni, then dive deep into an interactive job simulation in a field of your interest.

iBiology Courses | Helping you navigate your scientific journey
Take advantage of 2 online training courses in a self-paced format: Planning Your Scientific Journey and Business Concepts for Life Scientists. These courses, which are free and accessible at any time, can help graduate students become more effective scientists and plan for their future careers.
The Data Incubator | Data Science Fellowship

The Data Incubator is an intensive 8 week fellowship that prepares masters students, PhDs, and postdocs in STEM and social science fields seeking industry careers as data scientists. The program is free for Fellows and supported by sponsorships from hundreds of employers across multiple industries. In response to the overwhelming interest in our earlier sessions, we will be holding another fellowship. Anyone who has already obtained a masters or PhD degree or who is within one year of graduating with a masters or PhD is welcome to apply. Applications from international students are welcome. Everyone else is encouraged to sign-up for a future session.

For more information and application, click HERE or visit https://bit.ly/2KviGHk.

McGraw Center Job Opportunity | Graduate Student Fellow for STEM Undergraduate Learning Support

Do you want to share with Princeton STEM undergraduates the expertise you've developed around effective and efficient learning, problem-solving, and research? The McGraw Center’s Undergraduate Learning Program is seeking to fill a Graduate Student Fellow position to support undergraduate STEM students (with a particular emphasis on engineering students) in their coursework and independent research. The Fellow will develop content and deliver programming that enhances students’ learning and problem solving skills and strategies in STEM disciplines.

The STEM Fellow position is funded as an AI3 (equivalent to a course preceptor). Work hours are extremely flexible. To learn more, please contact Nic Voge at nvoge@princeton.edu.

Carpe Careers | How to advocate for change early in your academic career

Adriana Bankston offers six tips for how to effectively use your voice to benefit society early in your academic career. Read more...
